## Schemas

### Body_login_api_auth_login_post Collapse all object

grant_type Expand all (string | null)

username* string

password* string password

scope Expand all string

client_id Expand all (string | null)

client_secret Expand all string | (string | null) password

### BookingCreate Collapse all object

client_id* integer

class_id* integer

status Expand all (string | null)

### BookingResponse Collapse all object

client_id* integer

class_id* integer

status Expand all (string | null)

id* integer

booking_date* string date-time

created_at string date-time

client Expand all (object | null)

pilates_class Expand all (object | null)

### ClassResponse Collapse all object

id* integer

name* string

level* string

day_of_week* string

time* string

duration_minutes* integer

capacity* integer

studio_id* integer

instructor_id* integer

### ClientCreate Collapse all object

name* string

email* string

phone > Expand all (string | null)

age > Expand all (integer | null)

package_type > Expand all (string | null)

### ClientResponse ^ Collapse all object

name* string

email* string

phone > Expand all (string | null)

age > Expand all (integer | null)

package_type > Expand all (string | null)

id* integer

join_date* string date-time

created_at* string date-time

### HTTPValidationError ^ Collapse all object

detail > Expand all array<object>

### PrivateSessionCreate ^ Collapse all object

name* string

email* string

phone* string

preferred_date* string

preferred_time* string

experience > Expand all (string | null)

goals > Expand all (string | null)

injuries > Expand all (string | null)

### PrivateSessionResponse ^ Collapse all object

name* string

email* string

phone* string

preferred_date* string

preferred_time* string

experience > Expand all (string | null)

goals > Expand all (string | null)

injuries > Expand all (string | null)

id* integer

status* string

created_at* string date-time

### RegisterRequest ^ Collapse all object

email* string email

password* string

role > Expand all string

### TokenResponse ^ Collapse all object

access_token* string

token_type > Expand all string

role* string

email* string

### ValidationError ^ Collapse all object

loc* > Expand all array<(string | integer)>

msg* string

type* string
